

EthicsPoint Issue and Event Manager

HRIS INTEGRATION*

Making Information Available When and Where It's Needed.

EthicsPoint's Issue and Event Manager™ can integrate data from your Human Resources Information System (HRIS) into your case investigation and management process.

This integration makes it easier for all users to validate the identity of employees.

Pertinent information can be added into cases by showing specific information about employees when they are added to a case as participants. The Human Resources data fields are set separately, as appropriate, for each tier.

Integrate quickly and easily with your existing HR databases. EthicsPoint's Professional Services Organization (PSO) works with you and your team to define the data that needs to be integrated and coordinates the development of the interface. Enterprise class Extract, Transform, and Load (ETL) processing is utilized to integrate HRIS data in EthicsPoint's Issue and Event Manager.

By integrating performance, development and remuneration data with issue and event management data, you can drive retention and attraction of key personnel and build a culture of success.

The real benefits to bottom line now are in the strategic HR areas of talent management, consistent and effective application of HR policy, and the development of skills within the workforce in line with company performance and business goals.

The promise of an integrated HRIS solution is visibility and availability of information to those who need it, when they need it, enabling effective decision-making relevant to your workforce and business goals.

Elements of an EthicsPoint HRIS integration:

- Bi-directional Integration - Define the integration so that data is pushed from your HR data source to the Issue and Event Manager environment. Keeping data current in either environment becomes a seamless process!
- Client-defined Data Update - Establish the frequency of updates
- Client-defined Data Fields - Map up to 80 specific HRIS fields to the EthicsPoint environment
- Preformatted Reports - Improve the usefulness of reports generated by Issue and Event Manager with integrate HRIS information
- Best-Practice Integration Process - EthicsPoint's PSO walks you through a proven, pre-defined process for identifying and mapping data fields from your HRIS sources to the integration within Issue and Event Manager.
