

Selecting the Right EthicsPoint Case Management Solution

At EthicsPoint, we enable principled business decisions by providing Case Management solutions that increase awareness of organizational risk. EthicsPoint's Software as a Service (SaaS)-enabled framework facilitates compliance-based business processes and aggregate data through robust case management and rich visual representation.

Whether you simply need a confidential global hotline or require an enterprise-wide incident and case management solution with analytics and compliance reporting, the EthicsPoint Issue & Event Manager suite has the right solution for your organization.

Did we mention flexibility? With EthicsPoint's SaaS-based framework you can simply add more licensed users or upgrade to another edition that has more features as your GRC program evolves. There's no disruption to your business because we take care of everything behind the scenes.

Below, you'll find brief overview of the different capabilities of each service level offering. No matter which edition you select, you'll be joining over 2,300 customers around the globe who have entrusted their Governance, Risk and Compliance program to us.

epIEM Foundation:

A starting point for any company looking to combine the qualities of a compliance hotline with straightforward business processes. The epIEM Foundation solution supports the collection and investigation of reported issues from multiple sources and provides the necessary controls and transparency dictated by governmental mandates.

epIEM Professional:

Our next service level extends the capabilities of our epIEM Foundation solution offering by expanding the investigative details in support of a more complex workflow documentation strategy. epIEM Professional empowers case investigations from multiple departments with the ability to consistently and completely resolve and document all phases of any case investigation. The application ensures management has detailed insight into potential business risks.

epIEM Enterprise:

Our most advanced service level offering is ideal for clients who require customized data collection, cross-functional investigative workflow and advanced analytical capabilities, the epIEM Enterprise offering takes case investigation and dynamically integrates multiple workflows and investigative models while ensuring global consistency. The application is fully configurable to support a comprehensive enterprise approach to case investigation.

To gain a deeper understanding of the features and capabilities of each service level offering and to learn which offering is best suited to your needs please contact an EthicsPoint solutions consultant.
